

Scenario:

You are a research Zoologist that lives in the Brazil Manaus City. You find yourself continuously on the go and have trouble keeping up the newest world events happening around you. So, you would like to have an app that will help you keep in touch with events happening around the world.

Task 1: Select 5 News categories that interest you and personalize your news feed. Also enable notifications.

Task 2: Change the default language to Spanish and change formatting to only audio videos, and images.

Task 3: Select an article you like and rate the article from 1-10 and make comment on the article.

Notes

What changes you should make to your application?

Create dark and light background for the app. Also Create a button that allows users to go back to the previous article or home page. Create a few slides that shows how the app operates.

What you need to keep the same for your application?

Keep the Setting in the top right corner it easier to access. Keep the app simple design because it helps with people of older generations. Allow the users to use the app without signing into the app
